Professional Summary

Results-driven **Senior Software Engineer** with over **7+ years of experience** designing, developing, and deploying scalable web applications and microservices. Proven track record of building high-performance backend systems using **Node.js, NestJS, Spring Boot, SQL/NoSQL, LangChain**, and frontend interfaces with **React.js**. Adept in **API-centric architecture, system integrations, AI powered application, and cross-functional team leadership** in Agile environments. Recognized for **solving complex technical challenges**, and **delivering high-quality products** that meet business goals. Experienced in **cloud platforms (AWS)**, containerization (**Docker**), **CI/CD pipelines**, and distributed system design.

Skills

Languages: TypeScript, JavaScript, SQL, NoSQL, HTML & CSS, Java

Frameworks & Libraries: OpenAI & LangChain, NestJS, ExpressJS, Spring Boot, ReactJS

Tools & Technologies: Git & Github, Docker, Redis, AWS, VectorDB

Services: RESTful API, Micro-service, Object-Oriented Programming, Unit Testing

Soft Skills: Leadership, Communication, Agile Workflow, Teamwork, Problem-solving, Time Management

Work Experience

Senior Software Engineer

Savannah Tech | Tel Aviv (Remote)

May 2024 - Current.

- Enhanced software functionality by identifying and resolving complex technical issues.
- Converted legacy monolith into 8 microservices to reduce API response time by 70% and improving deployment frequency by 3 times.
- Mentored other developers, fostering professional growth and enhancing team productivity.
- Developed plugin apps for monday.com using agile methodologies for timely delivery.
- Managed multiple projects simultaneously while maintaining strict deadlines and high-quality standards.
- Maintained comprehensive documentation of development work, facilitating knowledge sharing among team members.
- Developed robust, scalable, modular, and API-centric infrastructures.
- Coordinates deployments of new software, feature updates, and fixes.

- Thinks out of the box and proactively takes action to solve complex problems or challenges within the organization.
- Developed AI-powered applications using LangChain to build context-aware, conversational agents and workflows.

Team Lead Developer / Software Engineer

Tsaron Technologies Limited | Lekki, Lagos

Jun 2022 - Sep 2023

- Coordinate the development cycle and ensure the successful delivery of sprint targets
- Plan and engineer application architecture and suggest the best technologies for the application
- Work with other third-party engineers in different time zones to deliver the business requirements and expectations
- Monitor progress and make adjustments as needed
- Write unit and integration tests for the API
- Led a team of 4 developers to deliver a B2B telematics platform, reducing system downtime by 25%
- Build complex algorithms to monitor a vehicle's life cycle
- Engage with the team daily to discuss customer requirements
- Use the existing protocol to provide real-time vehicle locations
- Build a library with the team to monitor vehicle faults, trips, and events
- Create features that drive away competitors in the telematics business

Technical Team Lead /Software Engineer

Waya Multilinks Technology Limited | Lekki, Lagos

May 2021 - Jan 2023.

- Oversee daily operations to ensure high-level productivity
- Predict resources needed to reach objectives and manage resources in an effective and efficient manner
- Created spreadsheets using Microsoft Excel for daily, weekly, and monthly reporting
- Utilize Industry best practices, techniques, and standards throughout the entire project execution
- Monitor progress and make adjustments as needed
- Build consistent APIs for cross-platform applications
- Write unit and integration tests for the deployed API
- Design database architecture and relational infrastructure
- Lead a team of 8 members while providing exceptional customer service
- Mentored and guided employees to foster proper completion of assigned duties.

Full-Stack Engineer

Swipe Technology Limited | Lekki, Lagos

Nov 2018 - Dec 2021

- Deployed RESTful web services using Amazon Elastic Compute Cloud (EC2)
- Collaborated with other teams on security, automation, and internal tools
- Integrated third-party libraries for authentication
- Implement unit, integration, and end-to-end testing during the development of a web application to avoid unexpected behavior of features on production, using MochaJS
- Pitched in to assist senior developers in meeting pressing deadlines during understaffed periods
- Implemented micro-services approach and developed RESTful API gateway for Stanbic IBTC Bank using NodeJS
- Developed static websites for banks (Stanbic IBTC Bank of Nigeria, Guaranty Trust Bank of Nigeria) using HTML, CSS, and JavaScript
- Collaborate with other developers to develop a container transit system web application using ReactJS and NodeJS.

Full-Stack Web Developer

Andela | Illupeju, Lagos

Aug 2018 - Nov 2018

- Collaborated with other developers to create an SPA web application that allows users to create and read articles, using ReactJS and Redux technologies
- Integrated third-party services for email, notification, payment, etc.
- Document RESTful API for client-side use
- Make full use of modern technologies like Redis in applications to enhance server response time
- Use best coding practices to write readable code and for code efficiency
- Attend daily meetings and regular sessions to meet the demands of the management
- Increased customer satisfaction by resolving issues
- Developed strong team communications and information for meetings
